Wireless Outdoor Noise & Temperature & Humidity Sensor

Introduction

RA0724Y is a Wireless Outdoor Noise & Temperature & Humidity Sensor. It can detect the value of noise, temperature, and humidity. The device will transmit the detected data to other devices via the wireless network for display. It adopts SX1276 wireless communication module.

Operating Principle

The module R100H (R100L) communicate with the noise sensor via RS485 and communicate with the sensor of temperature and humidity via I2C.

Main Characteristic

- Adopt SX1276 wireless communication module
- Noise detection
- Temperature and humidity detection
- With a waterproof mask
- Compatible with LoRaWAN™ Class A
- Frequency hopping spread spectrum
- Configuring parameters and reading data via the third-party software platforms, and set alarms via SMS text and email (optional)
- Applicable to the third-party platforms: Actility/ThingPark, TTN, MyDevices/Cayenne

Application Scenario

- Temperature and humidity detection
- Noise detection
